

SAUMYA SHARMA

☎ +91-9569716523 ✉ pseudo.0609@gmail.com 🌐 Saumya 🔄 pseud039 📍 Ghaziabad, India

Professional Summary

FullStack Developer with hands-on experience building and optimizing server-side logic, RESTful APIs, and database schemas using **Python**, **Node.js**, **PostgreSQL**, and **MongoDB**. Strong foundation in OOP, data structures, and agile development. Eager to deepen expertise in scalable application architecture and DevOps practices in a collaborative team environment.

Education

KIET Group of Institutions

B.Tech in Computer Science and Engineering (Specialization: AI & ML) | GPA: 7.80/10

Ghaziabad, India

2024 – 2028

Technical Skills

Languages: JavaScript, TypeScript, C++, Python, SQL, HTML/CSS

Backend Frameworks: Node.js, Express.js, Fastify

Databases: PostgreSQL, MongoDB, MySQL, Firebase

Tools & Practices: Git, Docker (basic), REST API Design, PWA

Experience

Software Developer Intern

Dec 2025 – April 2026

Elanine Creatives

Remote

- Developed and integrated backend APIs to connect **Shopify** storefronts with **Next.js** frontends, ensuring reliable data flow and reducing integration errors.
- Collaborated in an agile team to deliver 2 client projects on schedule, writing clean, maintainable code and maintaining technical documentation for each feature.

Freelance Web Developer

2025 – Present

Independent

Remote

- Built a CMS-driven blog platform using **Astro** and **Strapi**, designing content models and REST API integrations for a client-facing editorial workflow.
- Leveraged Astro's static site generation for SEO performance, handling meta, sitemaps, and structured content delivery.

Projects

Predine - Food Ordering Platform | *Express.js, PostgreSQL, Paytm, PWA, Docker*

Live App

- Built a scalable **Node.js** backend with role-based access control (JWT auth) for 4 user roles - client, chef, admin and super admin, reducing order processing time.
- Designed and optimized **PostgreSQL** schemas for real-time order management, with server-side caching to reduce database load.

CrawlKit - ECS inspired web crawling engine | *Fastify, PostgreSQL, Redis, BullMQ*

Alpha

- Designed around an ECS-inspired plugin architecture where fetch strategy, parse method, and politeness policy are fully decoupled components, swap any without touching the rest.
- Users configure crawlers using a single **YAML/JSON config file** and get structured, ready-to-use data as output.
- It can collect domain-specific web content, cleaned and chunked, ready for vector DB ingestion.

NGO Web Platform | *Node.js, Firebase, REST APIs, JavaScript*

GitHub

- Integrated **Firebase Authentication** (OAuth) and a secure payment gateway backend, processing numerous transactions and 40% faster page loads

Achievements

- Won 1st place at InnoForge; finalist in 2+ hackathons; **Runner-Up at Smart India Hackathon (SIH)** at college level
- Technical Coordinator at **Innogeeks**: Mentored 20+ students in backend development, DSA, and competitive programming
- **AWS Certified Cloud Practitioner** | Actively solving DSA problems on LeetCode (arrays, trees, graphs, DP) using CPP
